

Keep Winter Park Beautiful & Sustainable Advisory Board Regular Meeting

Agenda

July 19, 2022 @ 11:45 am

City Hall Commission Chambers

401 South Park Ave.

Winter Park, FL 32789

welcome

Agendas and all backup material supporting each agenda item are accessible via the city's website at cityofwinterpark.org/bpm and include virtual meeting instructions.

assistance & appeals

Persons with disabilities needing assistance to participate in any of these proceedings should contact the City Clerk's Office ([407-599-3277](tel:407-599-3277)) at least 48 hours in advance of the meeting.

"If a person decides to appeal any decision made by the Board with respect to any matter considered at this hearing, a record of the proceedings is needed to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based." (F.S. 286.0105).

please note

Times are projected and subject to change.

-
1. **Call to Order**
 2. **Consent Agenda**
 - a. [Approve Meeting Minutes from June 21, 2022](#) 2 Minutes
 3. **Public Comments (for items not on the agenda): Three minutes allowed for each speaker**
 4. **Action Items**
 5. **Non-Action Items**

[KWPBS June Meeting Mins](#)

Keep Winter Park Beautiful & Sustainable Advisory Board Virtual Minutes

June 21, 2022, at 11:45 a.m.

Commission Chamber
401 S Park Ave, Winter Park

Present

KWPB&S: Stephen Pategas (virtual), Catherine (Kay) Hudson, Carey Bond, Ben Ellis, Rishona S Teres,

Absent: Mark J Yonker

City Staff: Gloria Eby; Director of Natural Resources and Sustainability, Sara Miller; Sustainability Manager, Mia Brady; Sustainability Specialist, Johnny Miller; Event Manager, Victoria Tabor; Admin Coordinator/Recording Secretary

Guest: Mikayla Miller; Community Outreach Librarian - Winter Park Library

(1) Call to Order

Meeting called to order by Ben Ellis at 11:46 AM.

(2) Consent Agenda

Carey Bond motioned to approve the March, April, and May Meeting Minutes. Kay Seconded and the motion passed.

(3) Staff Updates

June 22nd Meet Our Department Presentation and Video- The Department worked with a private videographer at events including Earth Day, tree planting event, and shoreline restoration project. Sara Miller invited the board members to attend the presentation at the next City Commission Meeting.

Greenhouse Gas Inventory- The inventory for 2021 has started. Agnieszka was hired to complete the 2021 inventory to update the SAP which will be completed in advance of September 29th, which is when the commission will have a work session on Sustainability. The overall goal is for the Sustainable Action Plan to become a formal/adopted document.

Sustainability Fair & EV Car Show, September 24th- Kay Hudson requested event previously and Johnny Miller has been working on organizing it. Johnny chose the Train Station parking lot, as it is right across from the Farmer's Market and that will help with foot traffic and advertisement. The time frame should be from around 9am-11am to beat the heat. There will also be sustainability booths/vendors to promote programming especially our Green Businesses. Staff was also interested in offering EV vehicle test drives but Kay mentioned that this could be a liability. Staff will reach out to the City's legal team on this. Kay also brought up the National Drive Electric Week website where the city could register our event. This would help bring in volunteers who have electric cars and spread awareness about the event.

Board Appreciation Event- First event that is eco-friendly, with the main focus being waste diversion. O-town compost will be at the event to take all food scraps and bio-degradable items from the caterers. There will be a station in the actual event as well as in the back, in the kitchen. Before the event there will be a training for the whole team, other staff, and the caterers. This is the first of many sustainable events in the future.

Natural Resources and Sustainability Department Facebook page- This page will include all kinds of information such as what the Lakes Division as well as what the Sustainability Division is doing and advertising

events such as Earth Day, tree plantings, and cleanups. This will also be a good way for the community to know how to get more involved with our programs.

Orange County Fertilizer Campaign- We will be using OC's social media education package to post about the Campaign and fertilizer education messaging with summer black out period. This information will be attached to utility billing so it gets out to residents. Stephen Pategas shared that he and his wife have written an article in the Park Press about this Ordinance that will be published in the next issue.

Energy Conservation Rebate Program- The program has been started and is live on the website. The City is currently offering two rebates, one for duct repair and one for insulation. The Sustainability Division team will meet with 15 Lightyears soon to discuss restarting the energy audits. IT is also helping to create an automated system to process the audits and rebates to make it even more streamline. Utilities will process the rebate as a credit on the customer's utility bill.

Election Sign Recycling for the primary and general election- There was an initial collection event that happened in February and the marketing materials from that are in storage. We will collaborate with the City of Orlando and Orange County for this initiative. We are still waiting for payment from the City of Orlando for shipment of the signs to Nucycle Energy. Orange County is providing waste bins. Sara and Kay, leader of League of Women Voters, are meeting with Orlando and OC during the end of June. Members of the Leagues of Women Voters have volunteered to collect signs and the officials who are running in OC are being made aware so they can help with this program, too. The Communications team is going to help promote this initiative in the news. Kay shared that regionally, Seminole, Volusia, and Brevard County already have implemented this program. Kay also shared that the program has gone really well back in 2020 and that, in Winter Park alone, they had doubled their goal.

Public Clean-up Events- The first public event this coming weekend, Saturday June 25th, at the Baldwin Park Dog Park. This event has been posted on the website for over a month and eight people have RSVP'd. The plan is to first focus on the Dog park area and then move around the lake. The Streets Department is putting a street sign out in front of the clean-up location to inform people passing by the location. Kay asked about invasive removal and litter removal at Howell Branch Preserve and Gloria discussed past watershed clean-ups, such as with the SWAT team, who removed 260 pounds of trash. The next public clean-up is July 16th in Ward Park. Sara also shared that there is an invasive species removal scheduled in September with Mead Gardens.

Green Business Recognition Program- Mia Brady introduced herself as the City's new Sustainability Specialist and gave updates on restarting the program. The program has been paused due to change in staffing, but the program is being restarted. The recognition levels are being reworked so it is easier for the businesses to achieve higher recognition levels. There are a number of events coming up for the green businesses including the EV Car Show and a weekend-long clean-up in September. She is inviting the green businesses to the EV Car Show to present their sustainable initiatives.

Rollins College Collaboration- Mia has been working with Rollins to plan a clean-up for their incoming student service day in August. Rollins also has a group of students who need service hours and might work more with the Sustainability Division in the fall as either interns or just volunteers. Gloria also had a meeting with the Mayor of WP, WP's City Manager, and the President of Rollins to discuss sustainability. This collaboration was focused on the 100% renewable energy contract that the city is moving into. Rollins will be adding a delegate to the board so they can be more engaged with what we are doing in the community as well as receive updates on the contract.

(4) Public Comments (for items not on Agenda)

Mikayla Miller, Community Outreach Librarian, from the Winter Park Library gave the following updates to the board regarding their sustainability programming: Maker Day event on July 7th from 1-5pm, including seed library activities such as make your own macramé and flower planters. The Library is also working with the community center for community outreach. This past spring, they worked with the after-school program to teach 30-40 kids to grow beans and tomatoes from seeds which were then donated to the WP Housing Authority. Seed Library Funds- At the last board meeting, the WP Library had announced the start of the Seed Library and their goal to continue every year in the fall. Back in August 2021, the Library had asked the board for help with funding the project (seeds, promotional items, etc.) and the board had approved a budget of \$2,906 for the year. The board needs to vote on if they want to fund this project again for the

same amount. Ben Ellis asked for clarification on if the funds had already been given, to which Sara said they had not but the funding had been previously approved by the board. Part of the reason they had not been paid was due to the staffing updates within the Sustainability Division. Mikayla also informed the board that when the funds had been approved in 2021, the project had not yet launched, but at Earth day 2022, the Seed Library had their soft launch where they gave out 56 seed packets and met with 150 people. On June 2nd 2022, the Seed Library launched at the WP Library and it concluded on June 10th. Over the course of those eight days, they distributed 1,294 seed packets at up to 5 packets per person, meaning they reached approximately 300 people. On social media they reached over 100 people through Instagram and Facebook. On August 5th 2022, they are setting up their display in the Library, which will consist of a full stand near the East entrance. They also want to double the number of seeds, meaning there will be 3000 total seed packets consisting of 10 varieties. They will also provide seed paper bookmarks and use sustainable packaging. There will also be a survey and a newsletter. Gloria Eby explained that when the new team started they were unaware about funding this project, and therefore, they wanted to bring it to the board to reintroduce and discuss. Gloria also clarified that because the board approved this in October 2021, and a typical fiscal year runs October to September 30th, they are still within the fiscal year. The board should approve this Seed Library budget now for the next fiscal, October 2022 to September 30th, 2023. Kay Hudson made the point that the board had been very interested in this program. The budget will stay the same, but this year, the Library will have a larger display with the plants that they are giving out as seeds. Ben Ellis made a motion to approve the previously approved funding for this year as well as this budget of \$2,906 for the next fiscal year. Carey Bond seconded and the motion passed.

(5) Non-Action Items

No Non-action items.

(6) Action Items

Carey Bond recommended Ben Ellis continue as Chair but he respectfully declined and agreed to serve as Vice Chair. Stephen Pategas also declined the Chair position, as he will be focusing on America in Bloom in the coming year. Stephen nominated Kay Hudson to be the New Chair and Ben to be the Vice Chair. Carey motioned to approve, Rishona seconded, and the motion passed.

Staff requested information from the board regarding a past fundraiser, America in Bloom, as well as any other potential grants or awards that could be useful. Stephen Pategas currently serves this board. He explained that America in Bloom is a national not-for-profit organization that helps improve communities by providing advisors to assess them and make recommendations. The advisors come to the community for two days and KWPB provides accommodations. This had been on-going for six years in Winter Park but was paused due to the pandemic. There had been a committee formed through KWPB called Winter Park Blooms, made up of Winter Park residents, that Steven had chaired. That group had met monthly to work on the project as well as brainstorm ideas for the city utilizing various organizations and city resources. Attendees included: Casa Feliz, Hannibal Square Heritage Center, Parks and Recreation Department. Ben Ellis affirmed that America Blooms had more to do with the Keep Winter Park *Beautiful* side and less to do with the sustainability aspect. He noted that this third-party group was effective in evaluating the city and giving recommendations, making it a valuable organization. He credits Stephen with spearheading the program and is interested in restarting. Stephen clarified that America in Bloom has several categories with different metrics, some of which do include a sustainable component, and are more than just beauty. Some of these categories are: community vitality, flowers, landscape areas, urban forestry, celebrating heritage including historic preservation, environmental issues and overall impression. Stephen also explained that for at least three or four years they were selling donated caladium bulbs at the Farmer's Market to fundraise. During COVID, customers purchased the bulbs online and could pick them up at Mead Garden. The Winter Park Garden Club was very involved with this project and even helped with funding in the past. Sara is very interested in this program and thinks it would be great to restart, especially as it encompasses many parts of the Sustainability Action Plan (SAP). Stephen would be happy to spend more time outside of the board going through what is involved in this process. He will send out America in Bloom check list and Winter Park's previous community profile. Vanessa Balta had presented at the 2021 America in Bloom Virtual Symposium and the previous year; the City had been awarded the Outstanding Achievement Award for Environmental Efforts. Sara asked that

the board look for other awards or grants. Bringing in new interns who could help with this. Ben brought up the DOT grants that covers landscape improvements, especially for the medians. Sara mentioned FDOT who has helped fund promotional items, fanny packs and reusable straws, in the past. Stephen motioned to rejoin the America in Bloom program in 2023. Kay seconded and the motion passed

(7) Public Hearings

No Public Hearings.

(8) Board Comments and Green Minute

Carey Bond shared an article that she had read which discussed how Canada planned to get rid of all single-use plastics by the end of 2023. Sara Miller also saw that the National Parks Service is banning the use of all plastics. Mia Brady also shared two Green Business's initiatives that stood out: KOS coffee, which is almost a zero-waste establishment and Aeffect Hair Salon, who pays an outside company to recycle their salon products.

(9) Adjournment

Ben Ellis made a motion to adjourn and Carey Bond seconded. Meeting adjourned at 12:52 PM

Minutes approved the board on mm/dd/yyyy.

About

The Green Classroom Professional Certificate Program

1 of 1

The [Center for Green Schools](#) at USGBC proudly presents the Green Classroom Professional (GCP) certificate program. The GCP certificate program provides pre K-12 educators and school staff with the knowledge to identify what supports or impedes healthy, resource-efficient and environmentally sustainable learning spaces.

The course consists of 12 self-guided, interactive modules that allow participants to enter and exit the program on their own schedule within a 365-day window, and takes about two hours to complete. For more information about the online course, please see the [GCP Program Handbook](#).

The Green Classroom Professional certificate provides foundational knowledge of green building and the LEED green building rating system in the context of a school setting. For those who successfully complete the GCP, a natural next step to signify core competency in green building principles would be to prepare for the [LEED Green Associate](#) exam.

You may purchase access to the GCP for someone other than yourself, including, for instance, groups of teachers or school staff. Purchases of five or more access points to the GCP at one time qualify for a discounted bulk rate of \$25/person. Learn more about bulk purchases [here](#).

Receive a discount when you purchase together access to the Green Classroom Professional and an annual subscription to [Learning Lab](#), USGBC’s online platform for K-12 sustainability curriculum. Learn more about this bundled offering for K-12 schools and request an invoice [here](#).

Interested in organizing an in-person workshop that covers the content within the Green Classroom Professional course? Email schools@usgbc.org to inquire about instructor resources.

Make the case for taking the Green Classroom Professional course using [this one-page overview](#).

To sign up to receive more information about school resources and networks, subscribe to the Center for Green Schools digest in your USGBC profile, and download free “[Getting Started](#)” [checklists](#) from Learning Lab.

Resources:

- [Green Classroom Professional Program Handbook](#)
- [Every School Can Be A Green School: Getting Started Checklists](#)
- GCP Guide (see Additional Resources section beneath Course Modules to access this guide)

Objectives

1. Support the health of school occupants, including teachers, students and staff
2. Provide the best physical environment possible for student academic performance
3. Decrease absenteeism due to environmental factors
4. Support environmentally responsible practices by saving energy, saving water and improving indoor environmental quality
5. Understand opportunities to connect green practices with classroom curriculum and activities
6. Foster an appreciation among future generations for environmentally sustainable practices
7. Become part of the green schools and green building communities
8. Apply for elective continuing education credits to maintain a teaching credential
9. Identify future professional development opportunities or credentials to pursue, such as the LEED Green Associate

Pro Reviewer

This is an excellent Green Classroom certificate course. I want to share this course with so many people! It is an effective tool in educating our educators when they have so much influence over the knowledge and behaviors of our children.

The course walks through the LEED categories in a friendly, fun and educational way that is sure to engage the learner and create more interest in many of the several areas of sustainability in green

classrooms. The learner can take this course at their own pace, with easy navigation tools to go to whichever subject the learner wants.

This course will give our educators the knowledge and tools to shape our future generations in a sustainable way. This education will also provide our educators with the knowledge to help make our learning environments better for our students.

I would highly recommend this course for all educators who work in a classroom and school. This is a wonderful, comprehensive course introducing the many areas of sustainability in the classroom. I would also recommend this course to current green practitioners as it may be a new area of education regarding green classrooms.

This course is enjoyable and engaging with its professional slides and good narration.

KWPB&S Green Schools Grant Program

[City of Winter Park \(https://cityofwinterpark.org\)](https://cityofwinterpark.org) > [Departments \(https://cityofwinterpark.org/departments/\)](https://cityofwinterpark.org/departments/) > [Natural Resources & Sustainability \(https://cityofwinterpark.org/departments/natural-resources-sustainability/\)](https://cityofwinterpark.org/departments/natural-resources-sustainability/) > [Sustainability Division \(https://cityofwinterpark.org/departments/natural-resources-sustainability/sustainability-division/\)](https://cityofwinterpark.org/departments/natural-resources-sustainability/sustainability-division/) > [Community Engagement & Green Economy \(https://cityofwinterpark.org/departments/natural-resources-sustainability/sustainability-division/community-engagement-green-economy/\)](https://cityofwinterpark.org/departments/natural-resources-sustainability/sustainability-division/community-engagement-green-economy/) > KWPB&S Green Schools Grant Program

The city’s Keep Winter Park Beautiful & Sustainable (KWPB&S) Advisory Board Green Schools Grant Program awards mini grants to public and private schools serving Winter Park residents to help support their efforts to achieve sustainability goals and beautify their campus while engaging and educating students in the practices of sustainability. In addition, KWPB&S Winners receive funding to cover the cost of [USGBC Green Classroom Professional Certification \(https://www.usgbc.org/classroom/gcp\)](https://www.usgbc.org/classroom/gcp).

2021 KWPB&S Green School Grant Winners

School	Project
All Saints School	Build a water trough system to expand their Outdoor Classroom. This will teach the students about reducing water use and respecting natural resources.
Audubon Park School	Setting up a disposable mask recycling program in order to properly and safely dispose of masks and reduce waste.
Brookshire Elementary	Reestablish an organic garden as a communal effort by the school with a focus on sustainability. Will be planting milkweed to attract pollinators.
Parke House Academy	Refresh school garden and create a visual production on how to use medicinal herbs from their garden
Rollins College	Start a shoreline restoration project along Lake Virginia where volunteers will plant native species to help filter pollutants.
Winter Park 9th Grade Center	Start a recycling program for the collection of disposable masks and juice pouches in order to help the school properly and safely dispose of masks and reduce waste.
Winter Park Presbyterian Preschool	Continue expanding nature garden which science classes use to learn about the natural world.
